

TAKE ACTION: #PassSB611!

IT'S TIME TO FIX UNHEALTHY & UNSAFE SCHOOL BUILDINGS IN MARYLAND!

This winter we saw what can happen when we neglect our school buildings. Across the state and particularly in Baltimore, with every wave of freezing temperatures, heating systems broke down. It's time for our Senators to pass the Healthy School Facility Fund - SB 611!

[Tell Maryland Senators our kids can't wait any longer for healthy and safe school buildings! Pass SB 611 now!](#)

Many school buildings are in desperate need of maintenance, repair, and renovation, but local and state resources have been grossly inadequate to address the problems. Senate Bill 611 will provide \$30 million to make emergency facility repairs directly related to the health and safety of students.

By delaying passage of this bill, students will continue to suffer in buildings without sufficient heat and air conditioning systems. And the problem will cost more to fix the longer we wait. Our elected officials can step up now and show that they care. We need everyone to send messages to them so it's loud and clear: #PassSB611 now!

[The time is now! Take action to support our kids who deserve decent, and warm, learning environments.](#)
